

Decision Control And Flow Control.

C++, C, Java, Ruby, Python etc → These can
take decision.

This block is executed when condition in the if is false

Qⁿ Given a number, check if it is divisible by

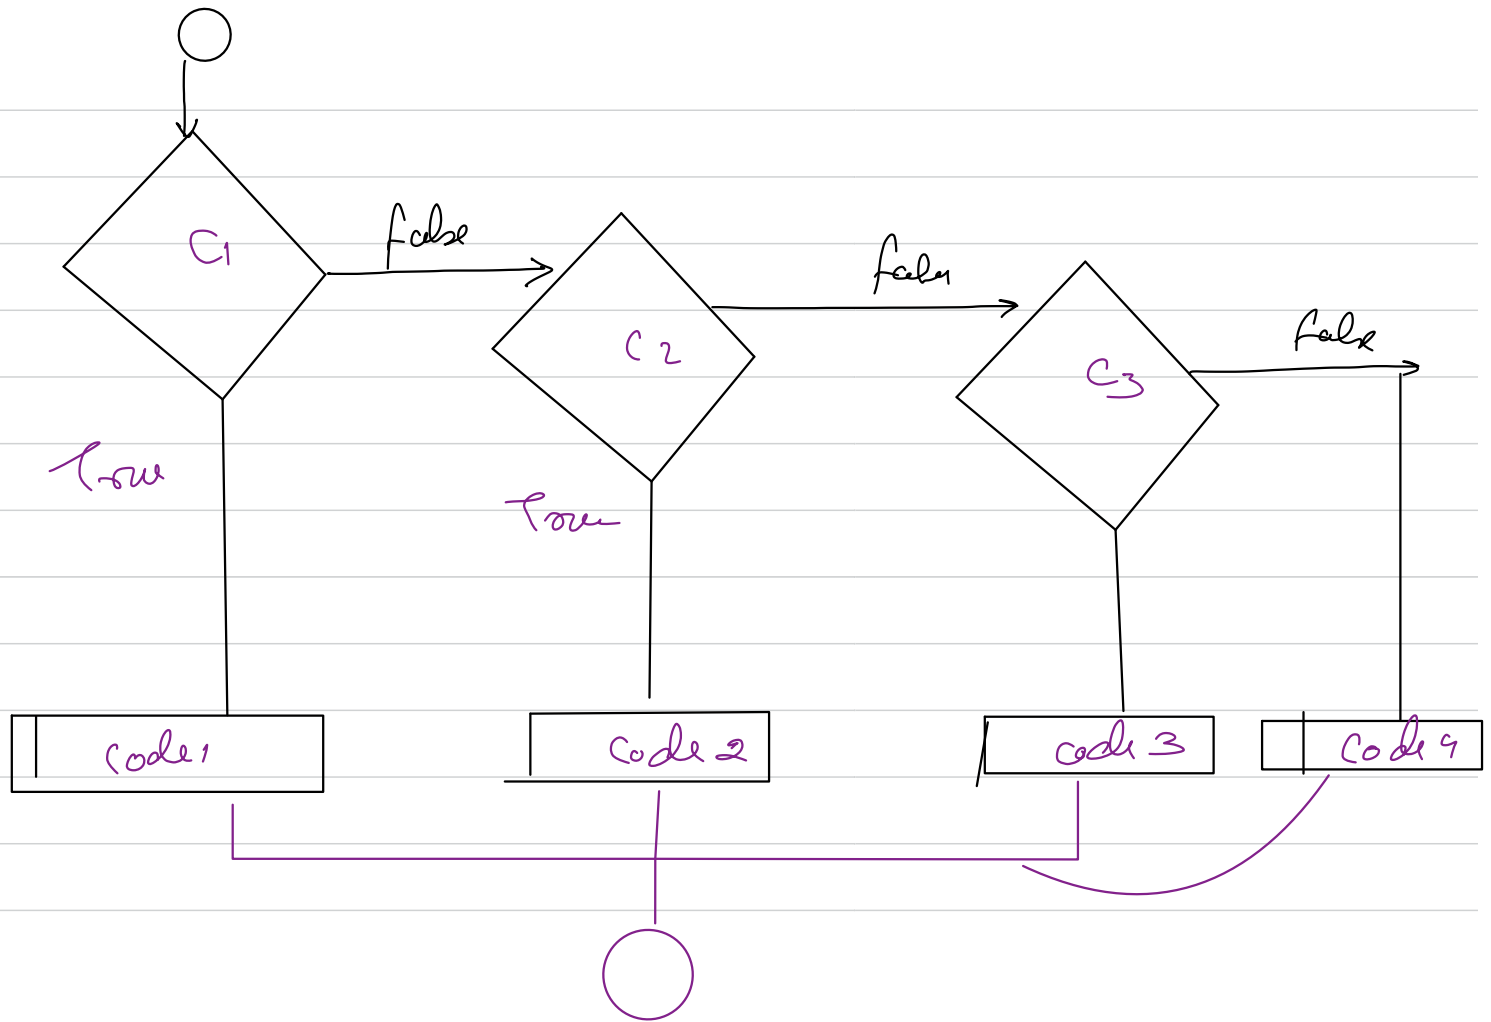

3 or 5 or both.

$10 \rightarrow$ divisible by 5

$15 \rightarrow$ divisible by 3, 5

$9 \rightarrow$ divisible by 3

$17 \rightarrow$ Not divisible

if () {

↳ Given a number, check if it is prime or not?..

↳ $x = 10 \longrightarrow \text{No}$

$x = 5 \longrightarrow \underline{\underline{\text{Yes}}}$

(2) $\longrightarrow (n-1)$

any no. in the above range divides x .
then x is composite.

prime / or not from

approach n iterations

$$1 \times 36$$

Q.1 107

You will be given
a no. S.

Ans $\rightarrow S=1$ ans = 5

$S=0 \rightarrow 1$

$S \rightarrow 0 \rightarrow 1$
 $S \rightarrow 1 \rightarrow 5$
 $S \rightarrow 2 \rightarrow 13$
 $S \rightarrow 3 \rightarrow \underline{\underline{25}}$

$$f(p_1, p_2) = |p_1.x - p_2.x| + |p_1.y - p_2.y|$$

find the no. of integers
(x,y) (coordinates), with
manhattan distance
from origin atleast
S.

$$\underline{\underline{S = n}}$$

A.P.

1	4	8	12	16
$n=0$	$n=1$	$n=2$	$n=3$	$n=4$
↓				
1	5	13	25	<u>41</u>

$$n \rightarrow 1 + 4(1 + 2 + 3 \dots \dots n)$$

$$\Rightarrow 1 + 4(n)(n+1)$$

$$\Rightarrow \underline{\underline{1 + 2n(n+1)}}$$

$$\begin{aligned} & 1 + 2(3)(3+1) \\ & 1 + 6 \times 4 \\ & \Rightarrow \underline{\underline{25}} \end{aligned}$$

$n=3$
